

Brainstorming & Idea Prioritization Template

Date	06-07-2026
Team ID	xxxxxxx
Project Name	Visualization Tool for Electric Vehicle Charge and Range Analysis
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Manchinilla Shanthi Jyothi	Develop an interactive dashboard to compare EV models by range, charging time, efficiency, and cost.	Dashboard & Visualization	1
2	Bodela Lakshmi Chandana	Collect EV charging and battery datasets and design responsive Tableau dashboards.	Data Collection & Dashboard	2
3	Kuruva Mounika	Store EV data in a database, perform SQL operations, create Tableau stories, and publish the dashboard.	Database & Web Integration	3
4	Katika Muzamil	Connect the database with Tableau and embed dashboards into a Flask web application.	Integration	3
5	Shaik Noor Hussain	Clean and preprocess EV data, apply filters, and prepare project documentation.	Data Preparation	2

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Build an interactive Tableau dashboard for EV charging, battery, and range analysis.	High	High	1	Yes
2	Collect, clean, and prepare EV datasets for visualization and analysis.	High	High	2	Yes
3	Integrate SQL database with Tableau and publish the dashboard using Flask.	Medium	High	3	Yes
