

Project Initialization and Planning Phase

Date	06-07-2026
Team ID	xxxxxxx
Project Name	Visualization Tool for Electric Vehicle Charge and Range Analysis
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A city energy planner	Analyze EV charging patterns and optimize charging infrastructure	Charging data is scattered across different sources	There is no centralized visualization dashboard for monitoring charging behavior	Concerned about making accurate planning decisions
PS-2	An EV fleet manager	Monitor battery performance and driving range	Battery health and efficiency vary across vehicles	There is no unified dashboard to compare battery performance	Worried about fleet efficiency and maintenance costs
PS-3	An electric vehicle buyer	Compare EV models based on range, charging cost, and efficiency	The required information is available on multiple platforms	There is no interactive tool to compare all EV models in one place	Confused about choosing the right electric vehicle
