Project Name	Visualization Tool for Electric Vehicle Charge and Range Analysis
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS	THINKS
• I want to buy the best EV. • I need to compare different models. • I want lower charging costs.	• Which EV offers the best value? • Will the driving range meet my needs? • Which model is more eco-friendly?

PERSON A NAME (<i>EV Buyer</i>)	
DOES • Compares EV specifications. • Reviews charging costs and range. • Uses dashboards before making a decision.	FEELS • Confused by scattered information. • Interested in sustainable transportation. • Confident after viewing comparison dashboards.
